Software Developer with 3+ years of experience spanning business and system analysis, frontend engineering, and end-to-end delivery. At CP Group I contributed to the migration of an internal ERP from Mendix to Next.js and C# across ten modules, analysing over 100 existing workflows and mapping legacy data into the new schema. I translate business requirements into production applications, owning features across workflow design, UX/UI, frontend development, API integration, testing, and release. I have owned internal modules serving 200–1,500 employees across CP Group business divisions and regularly collaborate with users, business stakeholders, and vendors to define and refine system requirements. I also own contributions to a shared, brand-customized design system and reusable component architecture. My background in industrial product design and an M.Sc. in IT Management gives me a user- and product-oriented perspective that bridges business and engineering.

EXPERIENCE

Software Development and Testing

Jul 2023 – Present

CP Leadership Institute, Bangkok

- Contributed to the migration of CP Group's internal ERP from Mendix to Next.js and C# across ten modules — Course, Cost Sheet & Allocation, Quotation, Biography, Enrollment, Invitation, Seat Reservation, Invoice & Credit Note, Login/Account/Role Permission, and PMS Evaluation — analysing over 100 existing workflows and business rules and translating legacy behaviour into the new system.
- Mapped legacy data onto the new schema for Master Data and Invoice across more than 20 table relations, working through old-to-new schema mapping so migrated behaviour matched the business rules it replaced.
- Tracked milestones and deliverables and raised delivery risks as they surfaced, took part in cutover planning and post-migration fixes, and demonstrated the PMS Evaluation module end to end to stakeholders while reviewing adjacent modules.
- Own frontend development across four internal business modules serving 200–1,500 users across CP Group business divisions, working across requirements, UX/UI, frontend architecture, API integration, testing, and delivery.
- Owned the full design of the PMS Evaluation module, and of the smaller Biography module. Re-architected the PMS evaluation form engine to support dynamic role assignment and evaluation workflows, removing weeks of manual setup per evaluation cycle and enabling role-based evaluation across participants.
- Designed and developed the Quotation Module end to end, including UX, information architecture, and frontend implementation, reducing quotation turnaround from 2–3 days to under 4 hours.
- Developed a bilingual Thai/English, multi-currency Invoice & Credit Note module with live FX rates and direct SAP REST integration, enabling international entities to generate documents within the system.
- Contributed to the shared frontend design system, proposing and adapting shadcn/ui into a brand-specific component system with reusable components, semantic design tokens, responsive patterns, and light/dark themes used across modules.

Store Layout Designer

Apr 2021 – Jun 2023

TD Tawandang Co., Ltd. (Carabao Group), Bangkok

- Designed in-store layouts and point-of-purchase fixtures across the company's retail footprint, optimising for revenue per square metre.
- Ran the full design cycle — brief, concept, technical drawing, production handoff — with marketing, merchandising and operations stakeholders.
- Spatial and user-flow design work that directly shapes how I approach interface and information architecture today.

DETAILS

Nationality Thai

Bangkok, Thailand

TECH STACK

CORE

TypeScript | JavaScript (ES6+) | React | Next.js (App Router) | HTML | CSS | ASP.NET Razor (.cshtml)

STYLING & MOTION

Tailwind CSS | Bootstrap | shadcn/ui | Motion / Framer Motion | Responsive design

STATE, FORMS & DATA

TanStack Query | Zustand | React Hook Form | Zod | REST APIs

TESTING & QUALITY

Jest | Vitest | React Testing Library | Scenario testing | SonarQube | Checkmarx (SAST)

TOOLING

Git | GitLab | Vercel | VS Code

INTEGRATION & DESIGN

SAP REST | Qsoft DMS | Supabase | Figma | Information architecture | UX research

DATA & ANALYSIS

Power BI | Python (pandas) | In-product reporting and dashboards

LANGUAGE

Thai (native)

English (professional working)

IELTS 6.5 overall

SELECTED PROJECTS

POCKITA — Personal investment tracker

pockita.vercel.app

- Tracks crypto, US and Thai equities, ETFs, gold, mutual funds, bonds, government savings and cash in one Baht-denominated view, with an optional USD toggle.
- Anonymous-first authentication — users start with no email, and can add email-OTP recovery later.

React · Vite · TypeScript · Tailwind · shadcn/ui · TanStack Query · Zustand · Supabase · Recharts · i18next

Interactive experiments (VI–IX) — Four live single-purpose sites

itagnats.github.io/happysixmonth itagnats.github.io/happysevenmonth
itagnats.github.io/happyeightmonth happyninemonth.vercel.app

- A monthly series of self-contained interactive sites: a 78-card tarot deck with four reading modes and 3D flip animation, a five-step isometric room configurator, a point-and-click hunt with drag-and-drop jigsaws, and a tap-to-reveal game.
- The tarot deck is built without a framework or backend — local JSON, a build script for card assets, and hand-written animation.

Vite · TypeScript · CSS · GitHub Pages · Vercel

CERTIFICATES & TRAINING

Data Analyst Level 4 *Jul 2023*
depa / GBDi / Mahidol University
Certificate of Completion (course and examination)

Data Analyst *Dec 2021*
Thailand Professional Qualification Institute (TPQI)

Cloud Essentials+ *Dec 2021*
CompTIA

Full Stack Engineer Bootcamp *Apr – May 2023*
CODESTAR

TF-SCALE Engineering Programme *Nov 2018 – Mar 2019*
Nanyang Polytechnic × Temasek Foundation, Singapore

LEADERSHIP

One Young World 2026

itagnats.github.io/choomchon-ai

CP Group · Cape Town delegation

Built ChoomChon AI (CP LocalAI Connect), an AI platform for Thai OTOP and community enterprises — ten agents across stock, cost, sales, packaging, marketing and sustainability, plus a “Local First” retail model placing community products into 7-Eleven, Lotus’s and Makro, from an Ayutthaya pilot to 100 communities in 18 months. Won the One Young World Thailand Future Sustain Hack Bootcamp; reached the final selection round for CP Group’s Cape Town delegation.

CP Exponential Surge 2025

2025

CP Group

Co-led two projects — ASAP, an AI shopping assistant built as a partner product for e-commerce platforms, and a Personal Data System exploring how AI could turn personal data into a digital asset. Both reached the Surging Star round — the final 11 of over 1,700 teams across CP Group.

TD Hackathon 2023

Feb 2023 – March 2023

TD Tawandang

3rd runner-up with BaoBar — a Carabao draft beer membership package for the TD convenience store format, pairing a recurring membership model with on-tap fresh beer service.
